(54) TABLET DIVIDER

(57) Abstract:

PROBLEM TO BE SOLVED: To provide a tablet divider capable of stably and precisely dividing tablets irrespective of the shape thereof.

SOLUTION: A tablet divider 1 for dividing tablets at a predetermined position comprises a rotary cutter 36 rotated for cutting the tablets, an alignment means for aligning the tablets moved a preset distance so that the longitudinal direction of the tablets is perpendicular to the direction of movement, a gripping means for gripping the tablets aligned by the alignment means in the longitudinal direction and then positioning the tablets to the rotary cutter, and a carrying means for carrying the tablets positioned by the gripping means to the rotary cutter.
